Seven daily essential mental activities to optimize brain matter and create well-being

Focus Time

When we closely focus on tasks in a goal-oriented way, we take on challenges that make deep connections in the brain.

Playtime

When we allow ourselves to be spontaneous or creative, playfully enjoying novel experiences, we help make new connections in the brain.

Connecting Time

When we connect with other people, ideally in person, and when we take time to appreciate our connection to the natural world around us, we activate and reinforce the brain's relational circuitry.

Physical Time

When we move our bodies, aerobically if medically possible, we strengthen the brain in many ways.

Time In

When we quietly reflect internally, focusing on sensations, images, feelings and thoughts, we help to better integrate the brain.

Downtime

When we are non-focused, without any specific goal, and let our mind wander or simply relax, we help the brain recharge.

Sleep Time

When we give the brain the rest it needs, we consolidate learning and recover from the experiences of the day.
